OpenJDK 11

Installing and using OpenJDK 11 for Windows
Abstract

OpenJDK 11 for Windows is a Red Hat offering on the Microsoft Windows platform. The Installing and using OpenJDK 11 for Windows guide provides an overview of this product and explains how to install the software and start using it.

Red Hat is committed to replacing problematic language in our code, documentation, and web properties. We are beginning with these four terms: master, slave, blacklist, and whitelist. Because of the enormity of this endeavor, these changes will be implemented gradually over several upcoming releases. For more details, see our CTO Chris Wright’s message.
PROVIDING FEEDBACK ON RED HAT DOCUMENTATION

We appreciate your feedback on our documentation. To provide feedback, you can highlight the text in a document and add comments.

This section explains how to submit feedback.

Prerequisites

- You are logged in to the Red Hat Customer Portal.
- In the Red Hat Customer Portal, view the document in Multi-page HTML format.

Procedure

To provide your feedback, perform the following steps:

1. Click the Feedback button in the top-right corner of the document to see existing feedback.

   **NOTE**

   The feedback feature is enabled only in the Multi-page HTML format.

2. Highlight the section of the document where you want to provide feedback.

3. Click the Add Feedback pop-up that appears near the highlighted text.
   A text box appears in the feedback section on the right side of the page.

4. Enter your feedback in the text box and click Submit.
   A documentation issue is created.

5. To view the issue, click the issue tracker link in the feedback view.
CHAPTER 1. OPENJDK 11 FOR WINDOWS INSTALLATION OPTIONS

OpenJDK 11 for Windows can be installed using an archive or through a graphical user interface using an MSI-based installer.

Depending on your circumstance, use one of the following installation methods:

- Installing OpenJDK with the archive
- Installing OpenJDK with the MSI installer
CHAPTER 2. INSTALLING OPENJDK 11 FOR WINDOWS WITH THE ARCHIVE

This procedure describes how to manually install OpenJDK 11 for Windows using the archive.

Procedure

1. Download the archive of OpenJDK 11 for Windows.

2. Extract the contents of an archive to a directory of your choice.

   NOTE
   
   Extracting the contents of an archive to a directory path that does not contain spaces is recommended.

3. Update the PATH as below:

   a. Add the bin directory contained in your OpenJDK 11 for Windows installation path to the %PATH% environment variable:

      C:> setx /m PATH "%PATH%;C:\Progra~1\RedHat\java-11-openjdk-11.0.1.13-1\bin"

      If the path contains spaces, use the shortened path name.

   b. Restart Command Prompt to reload the environment variables.

4. Verify the OpenJDK 11 for Windows is successfully installed, run java -version command in a command prompt and you must get the following output:

   openjdk version "11.0.3-redhat" 2019-04-16 LTS
   OpenJDK Runtime Environment 18.9 (build 11.0.3-redhat+7-LTS)
   OpenJDK 64-Bit Server VM 18.9 (build 11.0.3-redhat+7-LTS, mixed mode)

5. The %JAVA_HOME% environment variable must also be set to use some developer tools. Set the %JAVA_HOME% environment variable as follows:

   a. Open Command Prompt as an administrator.

   b. Set the value of the environment variable to your OpenJDK 11 for Windows installation path:

      C:> setx /m JAVA_HOME "C:\Program Files\RedHat\openjdk-11.0.1.13-1"

      If the path contains spaces, use the shortened path name.

   c. Restart Command Prompt to reload the environment variables.
CHAPTER 3. UPDATING OPENJDK 11 FOR WINDOWS USING THE ARCHIVE

OpenJDK 11 for Windows can be manually updated using the archive.

Procedure

1. Download the archive of OpenJDK 11.

2. Extract the contents of the archive to a directory of your choice.

   NOTE

   Extracting the contents of the archive to a directory path that does not contain spaces is recommended.

3. On Command Prompt, update **JAVA_HOME** environment variable as follows:
   a. Open Command Prompt as an administrator.
   b. Set the value of the environment variable to your OpenJDK 11 for Windows installation path:

      ```
      C:\> setx /m JAVA_HOME "C:\Progra~1\RedHat\java-11-openjdk-11.0.1.13-1"
      ```

      If the path contains spaces, use the shortened path name.
   c. Restart Command Prompt to reload the environment variables.

4. Set the value of **PATH** variable if it is not set already:

      ```
      C:\> setx -m PATH "%PATH%;%JAVA_HOME%\bin"
      ```

5. Restart Command Prompt to reload the environment variables.

6. Verify that **java -version** works without supplying the full path.

      ```
      C:\> java -version
      openjdk version "11.0.3" 2019-04-16 LTS
      OpenJDK Runtime Environment (build 11.0.3+7-LTS)
      OpenJDK 64-bit Server VM (build 11.0.3+7-LTS, mixed mode)
      ```
CHAPTER 4. INSTALLING OPENJDK WITH THE MSI INSTALLER

This procedure describes how to install OpenJDK 11 for Windows using the MSI-based installer.

Procedure

1. Download the MSI-based installer of OpenJDK 11 for Windows.

2. Run the installer for OpenJDK 11 for Windows.

3. Click Next on the welcome screen.

4. Check I accept the terms in license agreement, then click Next.

5. Click Next.

6. Accept the defaults or review the optional properties.

7. Click Install.

8. Click Yes on the Do you want to allow this app to make changes on your device?.

9. Verify the OpenJDK 11 for Windows is successfully installed, run java -version command in the command prompt and you must get the following output:

```plaintext
openjdk version "11.0.3-redhat" 2019-04-16 LTS
OpenJDK Runtime Environment 18.9 (build 11.0.3-redhat+7-LTS)
OpenJDK 64-Bit Server VM 18.9 (build 11.0.3-redhat+7-LTS, mixed mode)
```
CHAPTER 5. OPENJDK MSI INSTALLER COMPONENTS

(Optional) Set the following OpenJDK 11 for Windows MSI-based installer components:

**jdk**
Java Development Kit (JDK) files.

**jdk-registry-standard**
Registry keys:

- HKLM\Software\JavaSoft\JDK\<version>, entries:
  - JavaHome: <INSTALLDIR>
  - RuntimeLib: <INSTALLDIR>\bin\server\jvm.dll

- HKLM\Software\JavaSoft\JDK, entries:
  - CurrentVersion: <version>

**jdk_env_path**
Appends <INSTALLDIR>\bin to the system %PATH% environment variable.

**jdk_env_java_home**
Sets <INSTALLDIR> to the system %JAVA_HOME% environment variable.

**jdk_env_vendor_java_home**
Sets <INSTALLDIR> to the system %REDHAT_JAVA_HOME% environment variable.

**jdk_registry_jar**
Association for JAR files. Launch JAR files with the OpenJDK context menu.

**jmc**
JDK Mission Control files, installed into <INSTALLDIR>\missioncontrol.

**jmc_env**
Appends <INSTALLDIR>\missioncontrol to the system %PATH% environment variable.
The OpenJDK 11 for Windows MSI-based installer includes the *JDK Files* component and the following optional properties:

**Table A.1. OpenJDK 11 for Windows MSI-based installer properties**

<table>
<thead>
<tr>
<th>Property</th>
<th>Description</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>OpenJDK Runtime - Windows Registry</strong></td>
<td>The following registry keys are set HKLM\Software\JavaSoft\JDK&amp;lt;version&gt;, entries: JavaHome: &lt;INSTALLDIR&gt; RuntimeLib: &lt;INSTALLDIR&gt;bin\server\vm.dll HKLM\Software\JavaSoft\JDK, entries: CurrentVersion: &lt;version&gt;</td>
<td>Yes</td>
</tr>
<tr>
<td><strong>OpenJDK Runtime - Path Variable</strong></td>
<td>Adds the Runtime to the Path variable so it is available from the command line.</td>
