Abstract

This document describes compatibility of various Red Hat Ceph Storage versions with other products. Red Hat is committed to replacing problematic language in our code, documentation, and web properties. We are beginning with these four terms: master, slave, blacklist, and whitelist. Because of the enormity of this endeavor, these changes will be implemented gradually over several upcoming releases. For more details, see our CTO Chris Wright's message .

CHAPTER 1. COMPATIBILITY MATRIX FOR RED HAT CEPH STORAGE 5.0

The following tables list products and their versions compatible with Red Hat Ceph Storage 5.0.

Host Operating System	Version	Notes
Red Hat Enterprise Linux	8.4 and EUS 8.4	Standard lifecycle 8.4 is included in the product (recommended). RHEL EUS is optional.

IMPORTANT

All nodes in the cluster and their clients must use the supported OS version(s) to ensure that the version of the **ceph** package is the same on all nodes. Using different versions of the **ceph** package is not supported.

IMPORTANT

Red Hat no longer supports using Ubuntu as a host operating system to deploy Red Hat Ceph Storage.

Product	Version	Notes
Ansible	Supported in a limited capacity.	Supported for upgrade and conversion to Cephadm and for other minimal playbooks.
Red Hat OpenShift	3.x and 4.x	RBD,Cinder and CephFS drivers are supported.
Red Hat OpenStack Platform	16.2	Red Hat OpenStack Platform 16.1z8 and 16.2z1 will be supported with external Red Hat Ceph Storage 5.Red Hat OpenStack Platform 17 will be supported through external and director deployed.
Red Hat Satellite	6.x	Only registering with the Content Delivery Network (CDN) is supported. Registering with Red Hat Network (RHN) is deprecated and not supported.

Client Connector	Version	Notes
S3A	2.8.x, 3.2.x, and trunk	

Client Connector	Version	Notes
