Red Hat OpenShift GitOps 1.11

Removing GitOps

Removing OpenShift GitOps Operator from your cluster
Removing OpenShift GitOps Operator from your cluster
Abstract

This document provides instructions for deleting the Argo CD instances added to the default namespace of the OpenShift GitOps Operator. It also discusses how to remove the OpenShift GitOps Operator from your cluster.
Table of Contents

CHAPTER 1. UNINSTALLING RED HAT OPENSIFT GITOPS ........................................ 3
  1.1. DELETING THE ARGO CD INSTANCES .................................................. 3
  1.2. UNINSTALLING THE GITOPS OPERATOR ............................................. 3
CHAPTER 1. UNINSTALLING RED HAT OPENSHIFT GITOPS

Uninstalling the Red Hat OpenShift GitOps Operator is a two-step process:

1. Delete the Argo CD instances that were added under the default namespace of the Red Hat OpenShift GitOps Operator.
2. Uninstall the Red Hat OpenShift GitOps Operator.

Uninstalling only the Operator will not remove the Argo CD instances created.

1.1. DELETING THE ARGO CD INSTANCES

Delete the Argo CD instances added to the namespace of the GitOps Operator.

Procedure

1. In the Terminal type the following command:

   $ oc delete gitopsservice cluster -n openshift-gitops

   **NOTE**
   You cannot delete an Argo CD cluster from the web console UI.

After the command runs successfully all the Argo CD instances will be deleted from the openshift-gitops namespace.

Delete any other Argo CD instances from other namespaces using the same command:

   $ oc delete gitopsservice cluster -n <namespace>

1.2. UNINSTALLING THE GITOPS OPERATOR

You can uninstall Red Hat OpenShift GitOps Operator from the OperatorHub by using the web console.

Procedure

1. From the Operators → OperatorHub page, use the Filter by keyword box to search for Red Hat OpenShift GitOps Operator tile.
2. Click the Red Hat OpenShift GitOps Operator tile. The Operator tile indicates it is installed.
3. In the Red Hat OpenShift GitOps Operator descriptor page, click Uninstall.

Additional resources

- You can learn more about uninstalling Operators on OpenShift Container Platform in the Deleting Operators from a cluster section.
