CHAPTER 2. PACKAGE DESIGNATION

A package's designation states whether a package is core, non-core, or technology preview.

Core packages have higher levels of support than non-core. That is, all functionality provided by a core package is fully supported. Non-core packages, on the other hand, are only supported in the context of specific use cases, such as when they provide functionality required by a core package.

Technology preview packages are unsupported, but are provided in this release to provide early access to features that Red Hat intends to support in future releases.

For more information about package designation, see https://access.redhat.com/support/offerings/production/scope_moredetail.
