# CHAPTER 1. WHAT'S NEW

## Abstract

This section describes the main features and changes in version 6.3.

## 1.1. NEW FEATURES IN RED HAT AMQ 6.3

The primary aim of the AMQ 6.3 release has been stabilisation. There are many bug fixes, but no major new features in this release.

## 1.2. TECHNOLOGY PREVIEW FEATURES

The following features are provided as technical previews only in version 6.3, and are not suitable for production environments. For details on what "technical preview" means, see <https://access.redhat.com/support/offering/techpreview/>.

- Replicated LevelDB store. See chapter "Using the Replicated LevelDB Persistence Adapter" in "Configuring Broker Persistence" for more details.

## 1.3. IMPORTANT NOTES

### New Maven repository

Since AMQ 6.3, the AMQ Maven artifacts are available *only* from the following Maven repositories:

- <https://maven.repository.redhat.com/ga>
- <https://maven.repository.redhat.com/earlyaccess/all>

Hence for AMQ 6.3, you need to edit your Maven **settings.xml** file, replacing the old **repo.fusesource.com** repository URLs (at <https://repo.fusesource.com/nexus/content/repositories/releases> and <https://repo.fusesource.com/nexus/content/groups/ea>) with the new Maven repository URLs.

### NOTE

Older versions of AMQ (prior to 6.3) continue to use the old Maven repositories.

### ActiveMQ runtime can now be wired to JMS 2.0 API bundle in OSGi

In AMQ 6.3, the ActiveMQ runtime has been modified so that it is compatible with and can be wired to the JMS 2.0 API bundle. This does *not* imply that ActiveMQ supports JMS 2.0. In fact, ActiveMQ still supports JMS 1.1 only. This change does mean, however, that it is now possible to deploy an ActiveMQ broker (which is a JMS 1.1 application) alongside a JMS 2.0 compliant application in the same OSGi container. This can be useful, for example, if you want to deploy two different messaging products in the same Apache Karaf container.

### Upgraded Jetty from 8.1.x to 9

In the Apache Karaf container, Jetty (which provides the default HTTP servlet container for Karaf) has

been upgraded from Jetty 8.1.x to Jetty 9. This has a significant impact on the Jetty container configuration, affecting settings in the **etc/org.ops4j.pax.web.cfg** file and in the **etc/jetty.xml** file. For more details, see [chapter "Securing the Jetty HTTP Server" in "Security Guide"](#) .

## CHAPTER 2. DEPRECATED AND REMOVED FEATURES

### OPENWIRE JMS IS THE ONLY OPENWIRE CLIENT THAT WILL CONTINUE TO BE SUPPORTED IN THE NEXT MAJOR RELEASE OF AMQ

In the next major release of AMQ (AMQ 7.0), support for most of the OpenWire clients will be dropped. The only OpenWire client that will continue to be supported is OpenWire JMS.

### SUPPORT FOR KAHADB AND LEVELDB WILL BE DROPPED IN THE NEXT MAJOR RELEASE OF AMQ

In the next major release of AMQ (AMQ 7.0), both the KahaDB message store and the LevelDB message store will be dropped. JBoss AMQ 7 has its own message store implementation and data model.

### THE IMPLEMENTATION OF THE JDBC PERSISTENCE ADAPTER WILL CHANGE IN THE NEXT MAJOR RELEASE OF AMQ

While JBoss AMQ 7 will support a JDBC adapter, the AMQ 6.x JDBC adapter will not be supported on JBoss AMQ 7. A new JDBC store will need to be created.

### SUPPORT FOR APACHE KARAF (OSGI) CONTAINER WILL BE DROPPED IN THE NEXT MAJOR RELEASE OF AMQ

In the next major release of AMQ (AMQ 7.0), the Apache Karaf (OSGi) container will be dropped. AMQ 7.0 will be packaged as a standalone application, without any container technology.

### SUPPORT FOR FABRIC8 1.X WILL BE DROPPED IN THE NEXT MAJOR RELEASE OF AMQ

In the next major release of AMQ (planned as AMQ 7.0), Fabric8 version 1 will be dropped, to be replaced by Fabric8 version 2. The Fabric8 version 2 upgrade is a new generation of distributed container technology that is entirely cloud-based and leverages the OpenShift technology stack to provide the foundation for containerized AMQ applications.

### BIN/DELETEFABRIC8 SCRIPT HAS BEEN REMOVED

The **bin/deletefabric8** script has been removed in this release.

### TANUKI BASED WRAPPER FOR INSTALLING AMQ AS A SERVICE IS DEPRECATED

The Tanuki based wrapper scripts—generated using the **wrapper:install** Karaf console command—for installing AMQ as a service are deprecated since AMQ 6.3 and will be removed in a future release of AMQ. To install the Apache Karaf container as a service, it is recommended that you use the new **karaf-service-\* .sh** scripts from the **bin/contrib** directory instead.

## BIN/PATCH SCRIPT IS DEPRECATED

The **bin/patch** script (**bin\patch.bat** on Windows O/S) is deprecated and will be removed in a future release.

## SPRING DYNAMIC MODULES (SPRING-DM) IS DEPRECATED

Spring-DM (which integrates Spring XML with the OSGi service layer) is deprecated since 6.2.1 and you should use the Blueprint framework instead. Using Blueprint does not prevent you from using the Java libraries from the Spring framework: the latest version of Spring is compatible with Blueprint.

## REST API IS NOT SUPPORTED

REST API is *not* supported in AMQ 6.x and never has been. The REST API described in the Apache ActiveMQ community documentation, <http://activemq.apache.org/rest.html>, is only a demonstration, not a fully-developed feature. It cannot be used with AMQ 6.x and has multiple gaps in its functionality that make it unsuitable for production use.

# CHAPTER 3. KNOWN ISSUES

## 3.1. LIST OF KNOWN ISSUES IN AMQ 6.3

The following list describes known issues in version 6.3:

### [ENTMQ-1962 and ENTMQ-2061] Missing bin/contrib scripts in A-MQ distro

The AMQ GA distribution is missing **bin/contrib** scripts (for installing the broker as a service). The missing scripts have been made available in the rollup patch AMQ 6.3.0R1 and all subsequent rollup patches.

### [ENTMQ-1709] Missing kahaDB journal after broker failover in fabric8

When a master/slave broker with shared storage fails (unclean shutdown) it can cause a missing kahaDB journal. The issue was originally reported in a Fabric8 environment, but it also affects standalone Fuse instances. You can work around this issue by setting **ignoreMissingJournalfiles=true** in the kahaDB configuration. Without this setting the broker would refuse to start after failure, if it detects a missing journal.

### [ENTMQ-1933] Missing journal files after upgrading to 6.2.1 R2

When upgrading to 6.3, the message broker might report a missing journal files error in the KahaDB store. If you encounter this error, stop and restart the broker (thus forcing the index to rebuild). This issue occurs because of some additional checks we put in place for the KahaDB store.

### [ENTMQ-1909] C++ client subscription on topic is receiving only the first message sent

When the subscriber to a topic is a Qpid C++ client, the client receives only the first message sent. This issue is a regression in 6.3 and will be fixed in an upcoming patch.

### [ENTMQ-1504] [A-MQ, broker] disableAsyncDispatch="true" on transport connector appear to cause a thread deadlock

Do not set the option **disableAsyncDispatch="true"**, as this can lead to a deadlock condition.

### [ENTESB-7789] Upgrade qpid-jms-client Version Used By camel-amqp

The new **qpid-jms-client** is supported in FUSE 6.3 on only JDK 1.8.

### [ENTESB-5653] Profile-import fails on Windows paths (with backslashes)

When using the **profile-import** Karaf console command with Windows paths (using backslashes), the command fails, because the backslashes are left out. The workaround is to use forward slashes instead. For example:

```
JBossFuse:karaf@root> profile-import file:C:/jboss-fuse-6.3.0.redhat-069/out.zip
```

### [ENTESB-5892] Jetty - Applications: Links in the list are wrong

In the Fuse Management Console (Hawtio console) on the Apache Karaf container, when you navigate to the **Jetty** menu tab, the URL links for the Jetty applications shown on this page are incorrect.

### [ENTESB-5117] [patching] Add patch feature by default to admin:create child containers

By default, child containers created using the **admin:create** Karaf console command do not support the new AMQ patching mechanism, because the requisite **patch** feature is not available. You can work around this limitation by creating a child container using the following command:

```
admin:create --featureURL mvn:io.fabric8.patch/patch-features/1.2.0.redhat-630187/xml/features -  
-feature patch test
```

Where 1.2.0.redhat-630187 might need to be replaced by whatever version of fabric8 you are using in your container.

#### [ENTESB-5892] Jetty - Applications: Links in the list are wrong

If you click on the **Jetty** tab of the Fuse Management Console (Hawtio), the links appearing in the **Url** column of this page are incorrect.

#### [CAMEL-10237] Problem setting JMSX JMS properties on OracleAQ

The Camel JMS component is affected by a regression error that can cause problems integrating with Oracle AQ. This issue has already been fixed in the Apache Camel community project and the fix will be made available in a patch for AMQ 6.3.

#### [ENTESB-4408] Patching functionality in Fuse Management Console (Hawtio) temporarily disabled

The patching functionality in the Fuse Management Console (Hawtio) has been disabled since AMQ 6.2.1. This is because the Hawtio UI has not been updated to use the new patching mechanism. To install Fabric patches, use the Karaf console instead. This issue will be fixed in a future release.

#### [ENTESB-3938] AMQ 6.2.1 takes a long time to start up on OpenStack

When a AMQ 6.2.1 container is deployed on RHEL Openstack Platform, it can take a long time (several minutes) for the container to start up. A workaround is to add the following option to the JVM that starts the container (for example, by setting the **JAVA\_OPTS** environment variable):

```
-Djava.security.egd=file:/dev./urandom
```

The extra dot in the pathname, as in `./`, is required.

#### NOTE

The effect of the workaround is to replace the default **/dev/random** by **/dev/urandom**. The alternative is faster, but less random than **/dev/random**. This has an impact on any security packages that depend on this device to generate entropy and random numbers.

#### [FABRIC-963] Cannot create a fabric on a Windows 7 operating system with Java 7

To connect to the ZooKeeper server, you must change the connectivity type from IPv6 to IPv4. For the detailed solution, see the following Customer Portal article: [Cannot create fabric in JBoss Fuse 6.1 Beta on Windows 7](#)

#### [ENTESB-3192] Client session is dropped after fabric:create

The Client session is dropped after **fabric:create** is run. The workaround is to reconnect to the karaf console after fabric is created.

### [ENTESB-3039] [HTTP Gateway] apis mapping rules don't work right after deployment

If the **zooKeeperPath** property in the **io.fabric8.gateway.http.mapping-apis.properties** is changed, a gateway node restart will be required.

### [ENTESB-2924] Insight - Elasticsearch: JsonPretty error: Unable to get property 'toLowerCase' of undefined or null reference (:7999:6)

Insight Elasticsearch page is not supported in IE. The error occurs when clicking rectangles with numbers at Insight - Elasticsearch page.

### [ENTESB-2773] [platform AIX HPUX] camel-leveledb missing native library

The **camel-leveledb** feature is *not* supported on IBM AIX, HP-UX, and Oracle Solaris operating systems.

### [ENTESB-2513] OSE Fuse JVM sometimes dies with SIGABRT

RHEL customers need to upgrade openjdk to java-1.7.0-openjdk-1.7.0.79-2.5.5.3.el6\_6 or later which will fix the **SIGABRT**.

### [ENTESB-2069] Container which is created from Hawtio can not start if restarting openshift node

After restarting OpenShift, containers created from Hawtio cannot be started. This happens because the containers started before the ZooKeeper starts running will fail to start. The workaround is to wait for the start and keep restarting until we get connected to ZooKeeper.

### [ENTESB-3488] Fuse Fabric mq-create requires keytool to be installed

The **fabric:mq-create** command requires that the Java **keytool** command-line utility is provided on your PATH. If necessary, you can work around this requirement by specifying the **--no-ssl** option (which disables support for the SSL/TLS protocol).

### [Bug 1275786] Missing nss-devel dependency on Client and ComputeNode variants

The Qpid C++ client cannot be compiled from sources through the Client or ComputeNode channels on Red Hat Enterprise Linux (RHEL) 6 (due to a missing dependency on the package, **nss-devel**). In order to compile from sources, it is recommended that you install the Qpid C++ client through the Server channel instead.

### [ENTMQ-570] The jmx.restart feature might behave unexpectedly

When you install and use the **jmx.restart** feature, you might encounter errors.

## CHAPTER 4. RESOLVED ISSUES

### 4.1. MESSAGING - 6.3.0

[Table 4.1, "Messaging Issues Resolved in 6.3.0"](#) lists the issues resolved in version 6.3.0.

**Table 4.1. Messaging Issues Resolved in 6.3.0**

Issue Number	Description
AMQ-5854	Duplicate messages when failover is done during prepare phase of two phase commit.
AMQ-5856	allowLinkStealing option is not working when using mqtt over websocket
AMQ-5857	Message content stored twice while sending
AMQ-5865	Enable "getRemoteAddress()" method in WebSocket Requests
AMQ-5870	Lazy create if MQTTProtocolConverter in the WebSocket transport needs to be thread safe
AMQ-5875	Removing a destination when using mKahaDB can cause an IllegalStateException
AMQ-5890	AMQP: possible NPE when handling disposition with Modified state
AMQ-5891	AMQP: update to proton-j 0.10
AMQ-5895	FilteredDestinations do not work when loaded by runtimeConfigurationPlugin
AMQ-5903	Message headers are lost when using the Broker Component for Camel
AMQ-5914	Pull consumer hang when message expires in flight.
AMQ-5933	NullPointerException in SelectorAwareVirtualTopicInterceptor
AMQ-5972	Policy entries not applied in correct order
AMQ-6000	Pause/resume feature of ActiveMQ not resuming properly
AMQ-6005	Slave broker startup corrupts shared PList storage
AMQ-6013	Restrict classes that can be serialized in ObjectMessages
AMQ-6014	Offline Durable Topic Subscription exceeds memory limits
AMQ-6029	wss transport don't work with certificate authentication properly

Issue Number	Description
AMQ-6031	AMQP: use System.nanoTime() when deriving time to tick the transport with for idle-timeout handling
AMQ-6046	Concurrent access to a Transport from WebSocket client can deadlock
AMQ-6055	SASL PLAIN auth with AMQP doesn't take authzid into account
AMQ-6059	DLQ message lost after broker restarts
AMQ-6060	"Will message" retain property is not respected
AMQ-6065	Allow selective use of broker systemExitOnShutdown from DefaultIOExceptionHandler
AMQ-6066	Performance issue in OrderedPendingList
AMQ-6068	RAR - cannot reset clientId on pooled managed connection
AMQ-6069	Purging a Queue can lead to OOM error with prioritized messages
AMQ-6070	originalDestination property of advisory messages set to message id in error
AMQ-6071	Log info about corrupted journal records at WARN level
AMQ-6073	WebSockets no longer working on most browsers
AMQ-6074	AMQ4126Test#testOpenwireNIOSSLWithCertificate fails with JDK8
AMQ-6083	Broker starts on corrupted kahadb despite checkForCorruptJournalFiles="true" and ignoreMissingJournalfiles="false"
AMQ-6086	Broker stop and start are not at all thread safe - we can do better
AMQ-6088	Runtime configuration does not properly apply policy updates
AMQ-6094	Memory Leak with abnormal disconnecting consumers
AMQ-6102	JMX SubscriptionViewMBean reset statistics method doesn't reset
AMQ-6113	Add the X-Frame-Options" header for the WebConsole
AMQ-6121	Messages can continually expire from DLQ and back
AMQ-6122	Potential Deadlock when a duplicate message is read from the store for the DLQ destination

Issue Number	Description
AMQ-6124	failover backup transports do not update the brokerInfo leaving stale org.apache.activemq.ActiveMQConnection#getBrokerName
AMQ-6125	Potential NPE in session rollback if no default redelivery policy configured
AMQ-6128	browsing priority queue can return messages in different order than they will be consumed
AMQ-6131	Durable subscription rewrote in journal can be too aggressive and cause message loss on recovery
AMQ-6133	Message updates can cause message loss on recovery
AMQ-6137	Special escape characters in LIKE selectors do not work as expected
AMQ-6142	ActiveMQBytesMessage decompress throws DataFormatException incorrect header check
AMQ-6146	Use proper JSTL tags in the WebConsole
AMQ-6151	Redelivered messages bypass priority ordering
AMQ-6152	KahaDB scheduler log files not being deleted
AMQ-6168	STOMP: Connection should be closed on receiving an invalid STOMP Frame with unknown action value.
AMQ-6169	STOMP: Invalid frames are logged in warn messages
AMQ-6170	X-Frame-Options are not set for static content
AMQ-6171	illegal colon in broker name breaks vm transport
AMQ-6183	Provide the DispatchAsync value on Subscriptions to the SubscriptionViewMBean
AMQ-6194	Deleting a temporary queue creates a warning message in the broker
AMQ-6199	cursorMemoryHighWaterMark configuration not applied to topic subscription
AMQ-6206	properties in stomp non persistent messages are not reflected in the message size used for usage tracking
AMQ-6207	KahaDB: corruption of the index possible on sudden stop of the broker
AMQ-6208	The connector's jmx attribute UpdateClusterClients is not correct

Issue Number	Description
AMQ-6211	Synchronize creating of JMX OpenType objects
AMQ-6214	JAAS bug that causes user group membership not reloaded dynamically when reload is true
AMQ-6215	priority message dispatch can be affected by jms browser or expiry processing paging messages in error
AMQ-6218	Message content returns null occasionally from Virtual Topic to the consumer
AMQ-6221	ActiveMQTextMessage should synchronize on state changes
AMQ-6222	Message content can be cleared by mistake when isReduceMemoryFootprint is enabled
AMQ-6235	SimpleDiscoveryAgent doesn't honor it's configured initialReconnectDelay
AMQ-6240	Producer cannot be terminated when slow consumer is detected
AMQ-6246	STOMP: Unprefixed composite destination values not properly parsed
AMQ-6248	Failover - transport connected to one broker fails due to error in connection to another broker
AMQ-6250	MultiKahaDBTransactionStore should have null protection in close
AMQ-6254	Durable wildcard subscription causes memory leak after broker restart
AMQ-6256	ConcurrentStoreAndDispatch can lead to inconsistent message states using VM Transport
AMQ-6263	AMQP: Using JMS Transformer, preserve the type of the original MessageID
AMQ-6264	Deadlock on destination map - slow topic sub with slowConsumerAdvisory
AMQ-6275	Error when using ws transport connector
AMQ-6285	MessageDatabase doesn't properly cleanup the checkpoint scheduler on shutdown
AMQ-6286	Queue order lost on repeated redelivery
AMQ-6288	Message ack compaction needs to acquire the checkpoint lock
AMQ-6290	JMS Pool reconnection logic not always reliable
AMQ-6303	Message ack rewrite does not always set the right journal file type code

Issue Number	Description
AMQ-6305	AMQP: Drain requests can go unanswered in certain cases.
AMQ-6317	ActiveMQ createSchemaStatements are not executed on init if a previous createSchemaStatement failed on execution
AMQ-6340	Queue order lost on consumer close in some cases
AMQ-6350	PooledConnectionFactory throws 'IllegalStateException: Pool not open' after re-init
AMQ-6361	Message can remain inflight after consumer side expiration acknowledgements
AMQ-6370	JDBC message store - jdbc connection pool - potential deadlock with cleanup task when pool exhausted
AMQ-6372	KahaDB reader pool not releasing unused open files till deletion - too many open files
AMQ-6376	IOException on pageIn should involve IOExceptionHandler
AMQ-6378	KahaDb recover from corrupt metadata state locations that can be rebuilt
AMQ-6389	LoggingBrokerPlugin logs a message size equal to 0
AMQ-6392	Allow host name mapping with publishedAddressPolicy on a transportConnector
AMQ-6406	kahadb concurrentStoreAndDispatch - duplicate suppression in cursor needs to wait for possible store add
AMQ-6413	kahadb concurrentStoreAndDispatch - producer audit managed by store is skipped
CAMEL-1022	DOT generator (Visualizor) - Doesn't handle that pipeline is default
COLLECTIONS-580	[COLLECTIONS-580] Arbitrary remote code execution with InvokerTransformer
ENTESB-4902	Fuse 6.2.1 failed to handle maven repository url with special characters like "@" for authentication parameters.
ENTESB-4957	missing package org.apache.geronimo.osgi.locator for features:install pax-*-tomcat
ENTESB-5647	Need to add MRRC earlyaccess repo
ENTESB-5818	Upgrade httpclient version to latest, at a minimum > 4.3.4
ENTESB-5872	Unable to send JSON/Object to activemq in Camel

Issue Number	Description
ENTESB-5935	intermittent ServerModel LinkageError when connecting to ssh container
ENTMQ-1160	When ActiveMQ encountered exception during rollback, the message is stuck instead of retry the rollback.
ENTMQ-1180	Offline Durable Topic Subscription exceeds memory limits
ENTMQ-1419	Second connection request with Durable subscriber throws "Setting clientID on a used Connection is not allowed"
ENTMQ-1421	Broker starts on corrupted kahadb despite checkForCorruptJournalFiles="true" and ignoreMissingJournalfiles="false"
ENTMQ-1426	originalDestination property of advisory messages set to message id in error
ENTMQ-1428	AMQ4126Test#testOpenwireNIOSSLWithCertificate fails with JDK8
ENTMQ-1434	StompSubscriptionRemoveTest hangs on Solaris with JDK8
ENTMQ-1484	Implementation of AMQ-6077 in Fuse 6.2.1 is incomplete
ENTMQ-1517	The jboss-a-mq-6.3.0.redhat-012.zip does not startup properly
ENTMQ-1584	Threads Blocked On ActiveMQConnection.ensureConnectionInfoSent
ENTMQ-1656	Enable configuration for mqtt-over-ws transport
ENTMQ-1681	Issue with message ordering after transaction rollback
ENTMQ-1683	*:help missing descriptions for activemq commands
ENTMQ-1708	The connection to 'tcp://...' is taking a long time to shutdown
ENTMQ-1791	Regression in from ENTMQ-703 leads to metrics issue for temp transactional queues
ENTMQ-1822	Broker Unable To Recover After Exceeding File Descriptor Limit
ENTMQ-1823	Two clustered A-MQ nodes using JDBCPersistentAdaptor and lease database locker were active the same time
ZOOKEEPER-2380	[ZOOKEEPER-2380] Deadlock between leader shutdown and forwarding ACK to the leader
ZOOKEEPER-2383	[ZOOKEEPER-2383] Startup race in ZooKeeperServer

## 4.2. CONTAINER - 6.3.0

[Table 4.2, "Container Issues Resolved in 6.3.0"](#) lists the issues resolved in version 6.3.0.

**Table 4.2. Container Issues Resolved in 6.3.0**

Issue Number	Description
COLLECTIONS-580	[COLLECTIONS-580] Arbitrary remote code execution with InvokerTransformer
ENTESB-1609	Can not install fuse as system service on AIX7.1
ENTESB-3997	admin:create && admin:start doesn't work after 6.2 P2 patch
