PREFACE

Every Red Hat CodeReady Studio Integration Stack release is tested and supported on a variety of market-leading operating systems, Java Virtual Machines (JVMs), and technologies. Support information for each CodeReady Studio Integration Stack release is detailed here.

CHAPTER 1. CODEREADY STUDIO INTEGRATION STACK COMPONENTS

CodeReady Studio Integration Stack releases comprise the component versions as listed here.

Some components are categorized as Released or Early Access, where the latter indicates that the component is still under development at the time of release. You are encouraged to use Early Access components and to give feedback but be aware that the components are not fully supported, not guaranteed to work correctly, and subject to removal at any time, for any reason.
