

RED HAT INSIGHTS

Optimize your IT environment with proactive infrastructure management

OVERVIEW

Businesses are under pressure to increase efficiency, agility, and innovation. However, as technical environments become more complex, organizations must often delay progress toward strategic goals to focus on troubleshooting and resolving critical IT issues. To gain insight and address risks before they affect business operations, organizations can perform continuous monitoring and analysis of their IT infrastructure.

Red Hat® Insights provides Software-as-a-Service (SaaS)-based operations analytics, enabling customers to proactively manage their evolving IT environments. Red Hat Insights analyzes IT infrastructure against Red Hat's constantly expanding Knowledgebase to provide real-time assessment for risks related to performance, availability, stability, and security. After thorough analysis, any critical issues requiring attention are clearly displayed and prioritized by severity in an easy-to-navigate user interface.

Red Hat® Insights increases visibility into IT environments and provides trusted guidance to help businesses avoid disruption and optimize performance of their IT operations.
