Description

The Red Hat Certificate of Expertise in Platform-as-a-Service exam (EX280) tests the knowledge, skills, and ability to create, configure, and manage a cloud application platform using OpenShift Enterprise by Red Hat®.

This exam is based on OpenShift Enterprise 3.4.

Outline for this course

What you need to know

Red Hat encourages all candidates for the Red Hat Certified Specialist in OpenShift Administration exam to consider taking the OpenShift Enterprise Administration (DO280) course. Attendance in this class is not required, so one can choose to take just the exam.

While attending Red Hat classes can be an important part of one's preparation to take this exam, attending class does not guarantee success on the exam. Previous experience, practice, and native aptitude are also important determinants of success.

Many books and other resources on system administration for Red Hat's products are available. Red Hat does not officially endorse any as preparation guides for its exams. Nevertheless, you may find additional reading deepens understanding and can prove helpful.

Exam format

This exam is a performance-based evaluation of skills and knowledge required to configure and manage OpenShift Enterprise. Candidates perform the configuration and administrative tasks necessary to deploy OpenShift Enterprise and are evaluated on whether they have met specific objective criteria. Performance-based testing means that candidates must perform tasks similar to what they perform on the job.

Scores and reporting

Official scores for exams come exclusively from Red Hat Certification Central. Red Hat does not authorize examiners or training partners to report results to candidates directly. Scores on the exam are usually reported within 3 U.S. business days.

Exam results are reported as total scores. Red Hat does not report performance on individual items, nor will it provide additional information upon request.

Audience & Prerequisites

Audience for this exam

These audiences may be interested in earning the Red Hat Certified Specialist in OpenShift Administration:

- System administrators who want to demonstrate their OpenShift Enterprise skills
- Red Hat Certified Engineers who wish to pursue Red Hat Certified Architect (RHCA)
- System administrators or developers who are working in a DevOps environment using OpenShift Enterprise

Prerequisites for this exam

Exam candidates should:

- Be a Red Hat Certified System Administrators (RHCSA), or have comparable work experience and skills—a Red Hat Certified Engineer (RHCE) would be even better.
- Have taken the OpenShift Administration (DO280) course, or have comparable work experience using OpenShift Enterprise.
- Review the Red Hat Certified Specialist in OpenShift Administration exam (EX280) objectives.
